

 VERMOP

A STRONG PARTNER by your side

 VERMOP
PROFESSIONAL CLEANING SYSTEMS

Welcome to the professional cleaning specialist. VERMOP represents high-quality professional products and modular cleaning systems that are innovative, highly reliable and long-lasting.

ADVANTAGES FOR YOU AT A GLANCE

— Everything from a single source

As a full system provider, you procure everything from cleaning tools, machines and liquids to networking software from a single source. One contact. One service.

— Total state-of-the-art

VERMOP is constantly developing system solutions that respond to the latest research in terms of ergonomics and hygiene, such as the new generation of buckets, which can be 100% disinfected with wipes.

— Sustainable and digital

In addition to 100% green electricity in our factories, we already use over 70% recycled materials for our plastic components.

Mop covers and other products are increasingly produced or manufactured using climate-neutral processes.

We are also expanding our portfolio of networked products, and our smart software solution makes them practically unbeatable in terms of efficiency and transparency.
