

TURNADO 55 / 55 SV

The all-rounder with a plastic tank

The TURNADO 55 series of scrubber driers significantly reduces cleaning time. The brush head, which can be rotated 200° left and right, ensures that even hard-to-reach areas can be cleaned mechanically, eliminating the need for manual rework. The special TURNADO 55 SV swimming pool version even has a 360° rotating brush head, like the TURNADO 55 PRO.

The TURNADO 55 series is available in three different versions. The "standard" version and the SV swimming pool version of the TURNADO 55 are equipped with a double-walled plastic tank. The PRO version also features a stainless steel tank. The high-quality stainless steel chassis comes with a 10-year warranty.

Areas of application

- Can be used for almost any application:
 - Shops, salesrooms
 - Retail spaces
 - Supermarkets, etc.
- Warehouses, halls and workshops
- T55 SV: also ideal for use in swimming pool sites including changing rooms and narrow passages

Your advantages

- Easy operation and handling
- Up to 200° rotatable brush head to the left and to the right (enormous manoeuvrability and flexibility thanks to TURNADO technology); 360° for T55 SV
- Available with maintenance-free GEL battery or powerful Lithium-FePO4 battery
- Swimming pool version SV additionally equipped with stainless-steel rim and bearings for use in chlorine-containing areas
- Easily reach corners and niches when cleaning thanks to TURNADO technology
- Extreme manoeuvrability due to compact design

TURNADO 55 / 55 SV

The all-rounder with a plastic tank

The TURNADO 55 and TURNADO 55 SV are equipped with a durable and robust double-wall plastic tank. A volume of 45 litres is available for both, fresh and dirty water. The TURNADO 55 SV has been specifically optimized for use in acidic environments (such as chlorine-containing swimming pool floors). The enhancements include additional use of stainless-steel (for example, in the wheel bearings and rims), a special plastic cover as a splash guard on the brush head, and softer wheel rubber for smoother operation on tiled floors.

Technical data

– Working width brushes:	550 mm	– Theoretical cleaning performance	2.475 m ² / h
– Working width suction bar:	680 mm	– Brush diameter:	285 mm
– Dimensions (LxWxH)	920 / 408 / 1150 mm	– Brush contact pressure (brush/pad):	2,2 N/0,5 N/cm ²
– Clearance width:	670 mm	– Noise level:	75 dB / 69 dB BlueSave
– Tank volume (fresh/Dirty water):	see below	– Traction motor:	110 Watt
– Working time per battery charge:	up to 2,5 h	– Brush motor:	2 x 190 Watt
– Max. driving speed:	4,5 km / h	– Vacuum motor:	500 Watt
		– Max. water supply:	3,5 l / min
– Gel battery, maintenance-free:	24 V, 105 Ah	– Dead weight (incl. Gel battery):	178 kg
– LiFePO4 battery:	24 V, 100 Ah	– Dead weight (incl. LiFePO4 battery):	172 kg
– Gel battery weight:	2x 37,5 kg		
– LiFePO4 battery weight:	2x 12 kg		

The TURNADO 55 is available in the following versions (also with optional networking in each case):

- TURNADO 55: with 45 l fresh and dirty water plastic tank
- TURNADO 55 SV: with 45 l fresh and dirty water plastic tank as a special swimming pool version
- TURNADO 55 PRO: with 50 l fresh and dirty water stainless steel tank with membrane wall

NOTE:

The images show the TURNADO 55 SV. Visual differences on the outside mainly concern the color of the wheels and the machine labeling on the stainless-steel chassis.
