

| EQUIPE HOTEL

Separate disposal

VERMOP has developed a special detachable system so you can remove the disposal unit from the rest of the trolley with a single click. Now you can simply leave Equipe Hotel in the cleaning area while you dispose of waste or enter textiles into the laundry cycle separately.

Clear layout

The clear layout means that you always know where everything is, also making the most of the available space in the cleaning trolley.

Individual configuration and design

You can customise the size, height and individual components of your Equipe Hotel trolley, creating smart cleaning and room service combinations, for example, to meet your daily needs. All panelling can be aligned with your corporate design.

Effective storage of small items

Compartment dividers ensure small items can be neatly stored (choice of 4- or 8-compartment dividers).

More space with easy add-ons

The Equipe Hotel trolley can be expanded by attaching one or two add-on modules to support a disposal system, wet mop system or vacuum cleaner.

Easy to manoeuvre even when heavily loaded

Thanks to its lightweight design and ball-bearing wheels, the Equipe Hotel is easy to manoeuvre even when fully loaded.

OUR BENCHMARK: YOUR NEED

The Equipe Hotel's modular design means that you can adapt the trolley to your own individual requirements. Here are just a few examples for different cleaning jobs.

EQUIPE HOTEL DIGITALLY NETWORKED

The EQUIPE Hotel is also available in a networked version in "Digital-Silver" style, which looks particularly elegant. With the VERMOP ONE software solution, you have an innovative tool that will substantially boost your success and competitiveness. VERMOP is leading the cleaning industry into the next product generation with the implementation of "smart cleaning". This is because our digital solution has been specifically developed for professional cleaning, which will ensure you gain some strong competitive advantages. The solution connects the digital cleaning schedule with all the cleaning devices and also provides intelligent data analysis.

The infotainer on the cleaning trolley enables quick and direct communication with the cleaning staff. Rooms that have already been cleaned are reported directly to the reservation system. A needs-oriented room cleaning schedule can be created using the VERMOP ONE software solution for professional house keeping. Guests can use QR codes in each room to access a survey to assess their satisfaction with the cleaning.

We support you with our software solution and networked tools to optimise cleaning processes.

Fully connected: VERMOP ONE can, if required, network all the cleaning devices you need via a digital transmitter. The equipment therefore automatically reports all the relevant information back in real time. You can then effectively use this data to achieve unprecedented transparency regarding all the cleaning activities in your property. The system is cloud-based and easy and intuitive to use.

VERMOP – A STRONG PARTNER BY YOUR SIDE

VERMOP is one of the leading international manufacturers of products, systems and solutions for professional cleaning. Our traditional brand can look back on over 95 years of experience and is part of Freudenberg Home and Cleaning Solutions since 2023.

Our corporate commitment to quality has been certified in accordance with ISO 9001 for over 20 years, and we demonstrated our commitment to environmental issues when we received the ISO 14001 certification over 10 years ago. Simply closer: we provide a personal service which is available to you throughout Europe. Our sales representatives will provide onsite, professional and customer-oriented advice at any time.
