

The best EQUIPE ever

Our EQUIPE is the gold standard of fully enclosed cleaning trolleys, captivating not only with its particularly high-grade design – its clever configuration concept also permits over one million individual settings. With its complete range from small to large, it professionally meets every technical and spatial challenge.

EVEN THE BEST LEAVES ROOM FOR IMPROVEMENT

One thing our customers have been able to depend upon for over 95 years: We at VERMOP listen to them very closely. We constantly question the status quo. And we consistently advance the development of our cleaning solutions. And that's exactly what we have done with our EQUIPE cleaning trolley.

We put the entire concept to the test in terms of wipe disinfectability – as a whole and down to the smallest detail. The result: The new EQUIPE is the most functional, economical, ergonomically-perfected, adaptable and visually-appealing EQUIPE ever.

HEALTHCARE

THE SYSTEM FOR CLEANING EXPERTS

You are familiar with the cleaning challenges in your area of expertise. Allow us to convince you during an individual consultation, of how EQUIPE scores in your customer segment. For example in healthcare, in premises cleaning or hospitality. With EQUIPE, your efficient and reliable cleaning turns into a home game.

OFFICE CLEANING

HOSPITALITY

IN THE FAST LANE TO NEW SUCCESSES

Allow yourself to be convinced of the benefits of the EQUIPE.

Ergonomics

We have developed the EQUIPE on the basis of the latest ergonomic findings. It easily adapts to different user heights: The position and height of the containers can be set individually, all trolley functions and appliances can be reached comfortably and in a way that is easy on the back. Even when fully loaded, very little effort is needed to move it thanks to its smooth steering.

Hygiene

Even when very strict hygiene stipulations apply, system solutions from VERMOP are ideal. This makes the EQUIPE perfect for professional use in challenging cleaning environments. Its smooth surfaces and its closed bucket and castors minimise the risk of spreading germs. With the newly-developed foot pedal on the disposal unit, touch-free cleaning is very simple. And we've done even more: You can find all the new innovations in the overview on page 20.

Space miracle

The EQUIPE is a real space miracle. Its carefully-thought out concept results in a remarkably high loading capacity – with, at the same time, outstanding use of space: Fold-down elements and flexible arrangement of equipment and functions create a lot of additional extra space. At the same time, its uncomplicated manoeuvrability proves an invaluable benefit in tight, difficult areas of work.

Security

Nothing stands in the way of using the EQUIPE in high-security areas: The lockable toolbox, the chemical centre and the sturdy doors guarantee secure storage of critical content (e. g. cleaning chemicals). A uniform locking system easily prevents unauthorised access.

Efficiency

Thanks to the modular construction of the EQUIPE, cleaning professionals have everything on board to meet the requirements of their daily work. In combination with its high loading capacity, time-consuming trips to the cleaning cupboard are reduced to a minimum. A detachable unit permits, for instance, quick waste disposal or low-effort commissioning of soiled textiles for collection. The EQUIPE proves its efficiency with its high-end modular system which allows individual elements to be assembled on a customised basis.

RIGHT OF WAY FOR INNOVATION

For the new EQUIPE we have questioned not only the bigger picture – but also each individual detail.

Detachable disposal unit

The specially developed VERMOP detachment system separates the disposal unit from the supply unit with a single click. Now, waste or textiles can be separately disposed of or commissioned for collection. The EQUIPE simply remains stationary while this is happening.

Fold-up disposal unit

Detach or simply fold up? With the EQUIPE, the choice is yours. With one move, the disposal unit can be folded up. This permits a simple reduction of up to 30 % the required floor space.

Foot pedal

The lid of the disposal unit can be opened without hand contact using a foot pedal and gently closes automatically. This makes it possible to remove collected waste without touching it, minimising the risk of cross-contamination and ensuring ergonomic work practices.

Uniform locking system

One master key closes all the locks on the trolley (doors, toolbox or chemical centre). This permits secure storage and prevents unauthorised access.

Chemical centre

Safe and hygienic work processes are permitted by the lockable chemical centre, which prevents unauthorised access and offers space for almost all bottle sizes. The closed storage box results in a tidy appearance.

Multi-box

To match the appealing design of the EQUIPE cleaning trolley, the multi-box offers space for every shape of glove dispenser box and disinfection bottle from 500 to 1,000 ml. It is easily attached to the cleaning trolley's cross-bar and can be perfectly combined with the chemical centre. The easy-to-clean multi-box is further proof of more safe use, efficiency and hygiene in everyday cleaning situations.

Scandic X Toolbox

Floor and surface cleaning equipment is neatly accommodated in the toolbox. It allows individual equipment combinations and therefore promotes ergonomic, flexible and space-saving work practices. All equipment and trolley elements have their own permanent place. This permits safe storage and significantly reduces the risk of cross contamination.

High loading volume

The loading volume of the supply unit of up to 99 litres per tower can be individually configured to suit user requirements. Supplies for daily cleaning are effectively stored and ready to be transported, in boxes which can be easily pulled in and out. This reduces the number of trips to the cleaning cupboard – resulting in flexible and time-saving work practices.

Colour coding

A cleverly-designed, straightforward colour separation system marks all the elements – from bucket to cleaning textiles to mop. Ideal for ensuring even greater consistency of use, safety, efficiency and hygiene in the cleaning process.

Handle holder

A specially developed handle holder with screw fastening can be used all around the trolley. It is suitable for handle diameters of 22 to 30 mm and ensures secure attachment, simple handling and ergonomic and efficient work practices.

Smooth surfaces

An appealing design, hygiene and quality: Its aluminium panelling gives the EQUIPE form stability, sturdiness, outstanding cleaning properties, premium quality and a premium look, as well as an unusually long service life.

Height-adjustable driving handle

With the push of a button, the driving handle can be positioned at five different heights. This means that the handle can be effectively and ergonomically adapted to every user height. Incidentally, also available in combination with handle holders!

Multi-wall

The smart multi-wall system gives the EQUIPE cleaning trolley maximum flexibility. A total of 17 slot-in positions offer countless options when loading the trolley with 5, 15 or 35 L boxes. Combine again and again – depending on which materials you want to transport at the time. The multi-wall and the interior of the EQUIPE trolley is now also wipe-disinfectable: further proof that, at VER-MOP, hygiene and safety come first.

Optimised wheels

Due to the high-quality trolley wheels in 125mm standard size the EQUIPE practically moves by itself – even fully loaded. The quiet-running wheels make it perfect for use in noise-sensitive environments, such as in areas with patients or foot traffic. Furthermore, because its wheels are closed and easy to clean, it meets the highest hygiene standards (no dirt particles, such as hair, get caught in the wheel).

Mop rest

The closed, detachable tray for holding the damp mop can be attached at a number of points on the trolley and prevents water, dirt and germ soiling on the floor.

INDIVIDUALISATION DOWN TO THE SMALLEST DETAIL

With its elegant design, the new EQUIPE is guaranteed to make an impression on site. Motivate your employees with a tool they will be proud to be seen with. And design the EQUIPE just as you want it – as a rolling advertisement, it transports your corporate design and your professional image to customers and visitors.

Design the panelling elements of the EQUIPE to suit our own wishes: from company logo to coloured areas or complete designs. The VERMOP design team is looking forward to getting creative, together with you.

Individual design

Enclosed you will find a few examples for an individual design of the EQUIPE. Our graphics department creates a design that suits your company according to your wishes. Our employees will be happy to advise you.

OUR STANDARD: YOUR REQUIREMENTS

Thank to its modular concept, the EQUIPE can be custom configured to meet a range of different requirements. Here we present a number of examples for various areas of use.

EQUIPE Industry, without panelling,
detachable + Module Twixter wringer

EQUIPE Healthcare, without panelling,
fold up + Module Option

EQUIPE Healthcare, with panelling, with multi-
wall, fold up + Module Des

EQUIPE Healthcare 3 bars, with panelling, with
multi-wall

EQUIPE Maintenance, without panelling,
detachable + Module Sprint, crosswise

EQUIPE Maintenance, without panelling,
+ Module Option

EQUIPE Maintenance, with panelling, with
multi-wall

EQUIPE Healthcare, with panelling, with multi-wall, fold up + holding frame boxes 10 l

EQUIPE Healthcare, 3 bars, without panelling, detachable

EQUIPE Maintenance, without panelling, fold up + Module Sprint

EQUIPE Maintenance, with panelling, with multi-wall, detachable + toolbox + chemical centre + box 10 l

VERMOP EQUIPE CLEANING TROLLEY - THE FOCUS ON HYGIENIC CLEANING

Over the past few months we have been gradually adapting the proven VERMOP EQUIPE cleaning trolley to the requirements of the new DIN 13063 standard. The specific focus was to achieve better results with a process of wipe disinfection of the cleaning trolley components. From the outset, the EQUIPE was always designed to separate clean and unclean areas. However, we are now using larger panels to improve the interior of the disposal unit.

The bumper edge protection has also been redesigned to ensure wipe disinfection and greater stability. Enclosed areas on the chemical centre, multibox and the push handle also achieve work processes that are DIN-compliant. The new generation of EQUIPE buckets is celebrating its world première: the 6 L and 8 L versions have been updated to comply with DIN standards with "round corners" and removable elements that are easy to clean.

AN INTERIOR WITH A VARIETY OF POSSIBLE DESIGNS

There are also over 6000 possible configuration options for the interior of your EQUIPE.

VERMOP – A STRONG PARTNER BY YOUR SIDE

VERMOP is one of the leading international manufacturers of products, systems and solutions for professional cleaning. Our traditional brand can look back on over 95 years of experience and is part of Freudenberg Home and Cleaning Solutions since 2023.

Our corporate commitment to quality has been certified in accordance with ISO 9001 for over 20 years, and we demonstrated our commitment to environmental issues when we received the ISO 14001 certification over 10 years ago. Simply closer: we provide a personal service which is available to you throughout Europe. Our sales representatives will provide onsite, professional and customer-oriented advice at any time.

SUSTAINABILITY

Conserve valuable resources with EQUIPE

— Lasting flexible use

Replacement of components for altered premises requirements or change of premises

— Long service life

The use of high-quality materials
e. g. glass fiber reinforced plastic

— Production in Germany

Certified and transparent

— Availability of spare parts

Guaranteed available for at least five years

— Recyclable

All elements of the trolley recyclable after use
