

EGGSTACY – THE SOFTWARE SOLUTION FROM VERMOP

DIGITALISATION made easy

With the VERMOP software solution, you have an innovative tool at your disposal that will sustainably increase your success and competitiveness. With the implementation of "Smart Cleaning", VERMOP is leading the cleaning industry into the next product generation. This is because **EGGSTACY**, our specially developed digital solution for professional cleaning, equips you with strong competitive advantages. It networks the digital cleaning schedule with all cleaning devices and provides intelligent data evaluation at the same time.

VERMOP SOFTWARE: THE DIGITAL SOLUTION FROM SPECIALISTS FOR SPECIALISTS

Everything networked: **EGGSTACY** connects all the cleaning equipment you need with the help of a digital transmitter. As a result, the equipment automatically reports back relevant information in real time. With the data obtained in this way, you benefit from unprecedented transparency about all of the cleaning activities in your property. The system is cloud-based and easy and intuitive to use.

However, **EGGSTACY** also impresses with numerous functions for documenting and performance evaluating the cleaning process.

For example, for the first time in the history of professional cleaning, you can see at a glance which routes a cleaning trolley covers within a domain and compare contractually agreed working times with actual times. Based on continuous data collection, you will be able to identify optimisation potential in your processes and improve them efficiently.

EFFICIENCY PROBLEMS IN THE INDUSTRY VERMOP SOFTWARE RESPONDS WITH INTELLIGENT SOLUTIONS

CLEANER DIEGO

English is my second language,
long lists are a challenge for me.
Often my activities change at short notice
within my daily routine.

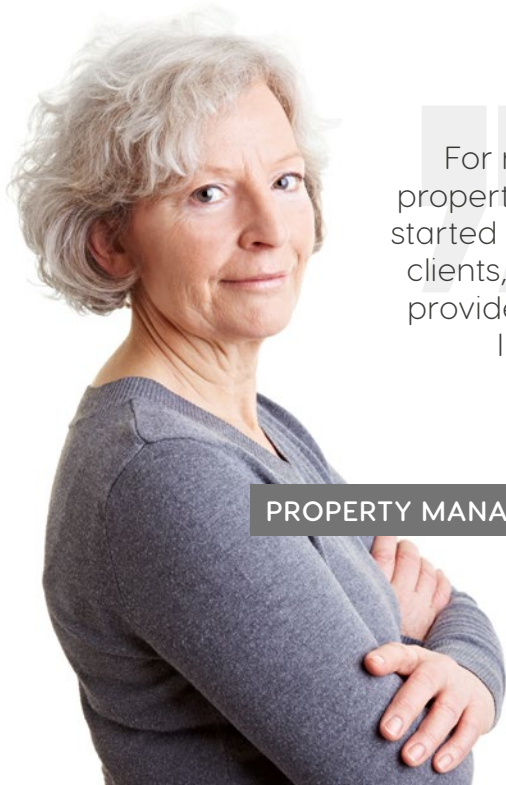

The digital cleaning schedule works
exclusively with pictograms.
It contains your daily
service specifications with real-time updates.

My time is short, I spend a lot of it managing my
team. Training new colleagues also means effort.
And I have to communicate complex issues to my
team, for example, the correct sequence
of the cleaning work.

You can see actual data about the
presence of your team, their rounds
status etc. in real time, for example on
your smartphone, which saves you time-
consuming enquiries. The digital cleaning
schedule presents all work steps in the
correct sequence and with language-
neutral pictograms. Even difficult topics
are presented simply and with pictures.

FOREWOMAN HELGA

For me, it is crucial to know whether my properties are occupied and when the rounds started and ended. For the discussions with my clients, I have to document all of the services provided. To ensure quality in the properties, I need comprehensive checklists.

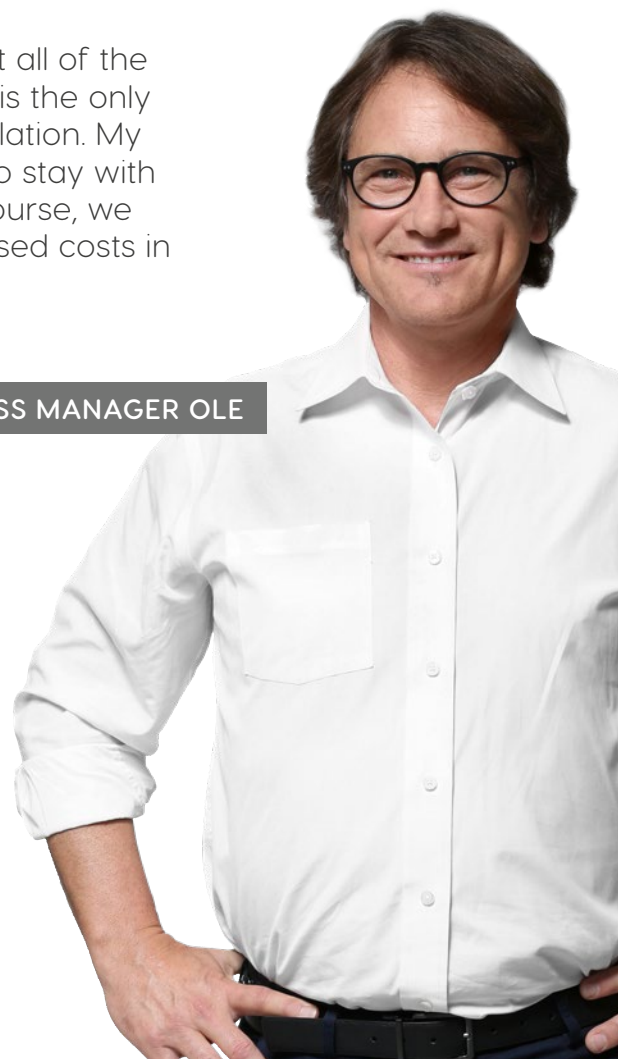

PROPERTY MANAGER GERTRUD

On the **VERMOP web portal**, you can call up actual presence, target and actual times in real time. The logbook provides you with detailed information about the services delivered. A quality checklist is drawn up on the basis of the activities carried out.

I need complete transparency about all of the services provided to my clients. This is the only way I can proactively manage escalation. My success factor is satisfied clients, who stay with our company long-term. And, of course, we deliver maximum efficiency at optimised costs in everything we do.

BUSINESS MANAGER OLE

The complete **EGGSTACY** world, with its digital cleaning tools and web portal, gives you a unique insight into what's happening with your clients' cleaning - from your desk or any mobile device. Provable data in real time combined with clever analysis tools offer you maximum transparency.

YOUR ADVANTAGES WITH OUR SOFTWARE SOLUTION

Your work processes are about to undergo a revolution! Thanks to the data you gain through **EGGSTACY**, you benefit from the transparency of all cleaning processes. This transparency not only proves work that has already been done, it also illustrates optimisation potential across the entire cleaning process. The advantages are obvious:

— Improved quality

EGGSTACY produces verifiable proof of performance fully automatically. This helps fulfil client promises precisely and with evidence. The quality of your services will be significantly increased.

— Cost optimisation

EGGSTACY focuses on maximum cost transparency, because our system allows you to plan your staff more efficiently by allocating them according to demand. The system is intuitive to operate and self-explanatory, which keeps training and instruction costs low.

— Increased efficiency

EGGSTACY is the digital response to all of the challenges that arise in relation to continual process optimisation, reliability and transparency. The system helps to optimise restocking trips and travel times within a property, the ideal deployment scheduling for staff and capacities and the easy billing of special services.

— Customer satisfaction

You benefit from the complete documentation of cleaning services provided, which **EGGSTACY** guarantees. This ensures collaboration based on trust with your clients and is highly conducive to long-term customer satisfaction.

— Process reliability

By documenting posted networked warning signs, **EGGSTACY** provides security and protects the service provider from unauthorised claims.

HOW IT WORKS THE HARDWARE WORLD

Via a sensor attached to the cleaning devices, movement data is transmitted to the central **EGGSTACY** server in the cloud using wireless technology. The data collected in this way provides detailed information about all the processes of your cleaning operation and can be conveniently viewed and evaluated in real time via a website on any device.

Web portal accessible on all Internet-enabled devices

Cleaning trolley
Infotainer sends data to the cloud

Infotainer with cleaning schedule
Displays the cleaning schedule with the help of easy-to-understand pictograms (language-neutral)

Sweeping set D
Sends usage data to the Infotainer if required

Warning sign D
Sends usage data to the Infotainer if required

Scandic X D
Sends usage data to the Infotainer if required

Jetvac SD 12 D
Sends usage data to the Infotainer if required

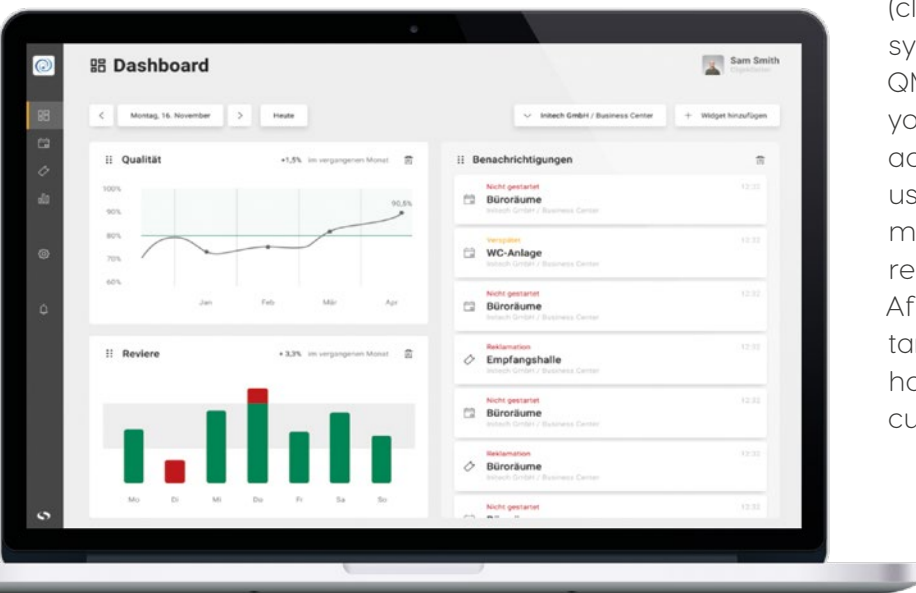

HOW THE VERMOP SOFTWARE SOLUTION WORKS

The **EGGSTACY** software in the cloud is available on all your Internet-enabled devices and offers you various functions that will make your daily routine much easier:

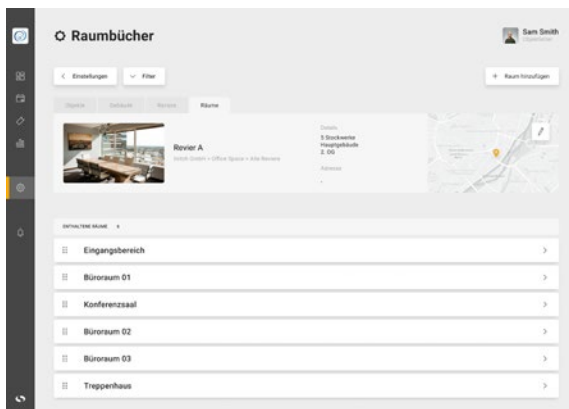

- The **web portal** offers you various functions (cleaning time recording, room data sheet system, logbook documentation, integrated QM checks and ticket creation) to manage your cleaning processes and to be able to act proactively. Here, all cleaning process and usage data from the devices equipped with motion sensors is collected and processed in real time.

After logging in, you will find the most important information quickly and clearly on the homepage, e.g. which cleaning rounds are currently running or the current tickets.

- **Cleaning time recording:** with this function, the cleaning times of your cleaning staff, i.e. attendance as well as start and end times, are collected.

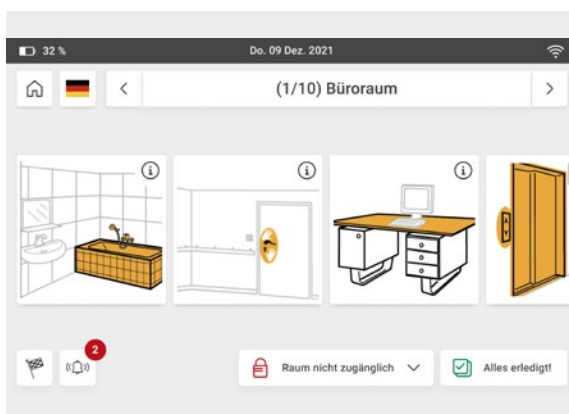

the EGGSTACY software interface of the web portal

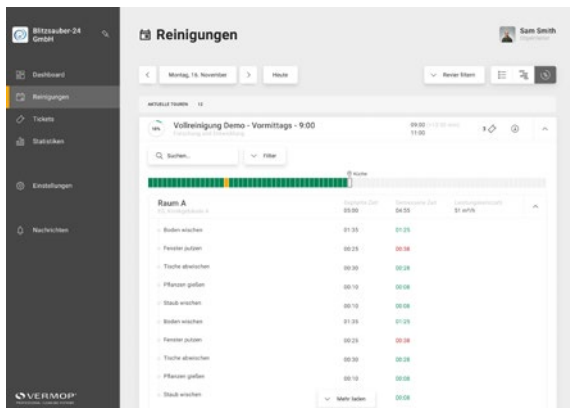

EGGSTACY room data sheet, the digital room data sheet

- **Room data sheet:** the digital room data sheet maps all rooms in your property with their special characteristics.

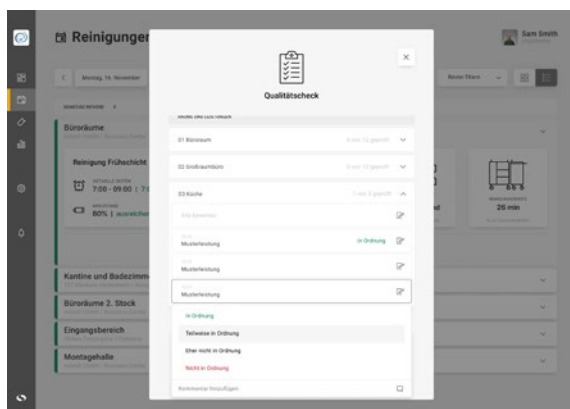

EGGSTACY Infotainer (tablet), the digital cleaning schedule for the cleaner

- **Infotainer (tablet):** a digital cleaning schedule is generated based on the room data sheets and service specifications entered in the web portal. Via the tablet on the cleaning trolley, this shows the cleaner the work to be done every day in the form of language-neutral pictograms. Use the universal VERMOP standard templates (healthcare, office building, school), which you can easily adapt to your needs.

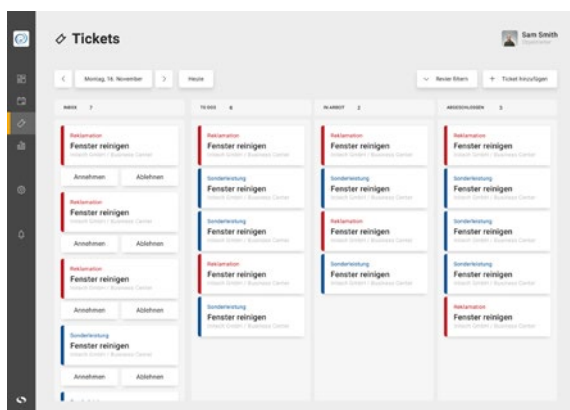

EGGSTACY logbook

- **Logbook:** With this function, you can document the actual cleaning activities with time stamps in a summary based on the Infotainer (tablet) cleaning schedule, e.g. as a basis for discussions with your client.

EGGSTACY QM check

- **QM check:** With this function you can create a list of the work that has actually been done and then use it as a checklist for your quality check.

EGGSTACY ticket

- **Ticket:** You can use this function to send spontaneous client requests or unplanned additional tasks to the cleaner.

The VERMOP service team is here to provide you with information and advice.

Other services:

-->Advanced:

- We create a customised room data sheet together with you
- We configure your individual cleaning schedule with you on the basis of the domains you have created

--> Training:

- Training at all levels, from property management to cleaning staff

VERMOP – STRONG BY YOUR SIDE

VERMOP is an internationally leading manufacturer of products, systems and solutions for professional industrial cleaning.
