

I TURNADO 55 PRO

The all-rounder with an aluminium tank

Our patented series of TURNADO 55 scrubber driers significantly reduces the required cleaning time. The scrubbing suction head of the TURNADO 55 machines, which can be rotated by up to 360°, ensures that even hard-to-reach areas can be cleaned by machine, making manual reworking unnecessary. The TURNADO 55 series is available in three different versions. As the PRO model, the TURNADO 55 is equipped with an aluminium tank with membrane wall and thus holds 50 l of water, which is available for cleaning. The powerful TURNADO 55 machines are the all-rounders among our scrubber driers and can be used in almost all areas. Thanks to EGGSTACY, the software solution from VERMOP, the TURNADO 55 can also be networked and is thus fully at home in the Internet of Things (IoT). The high-quality stainless steel chassis also comes with a 10-year warranty.

Areas of application

- _ Can be used for almost any application: Shops, salesrooms, storage and work halls, workshops, etc.
- _ Narrow storage areas and aisles due to TURNADO® Technology

Your advantages

- _ Digital networking
- _ 360° rotatable scrubbing suction head (enormous manoeuvrability and flexibility thanks to patented TURNADO® technology)
- _ Longer usage times due to larger tank volume (for the PRO)
- _ Easy to use
- _ Extreme manoeuvrability due to compact design

TURNADO 55 PRO

The all-rounder with an aluminium tank

TURNADO® technology, which even allows the machine to reach into corners and niches. Even when reversing, the head always turns independently in the working direction so that water application, cleaning and extraction can proceed in the correct sequence.

Technical data

– Working width of brushes:	550 mm	– Theoretical cleaning rate:	2475 m ² /h
– Working width vacuum barn:	680 mm	– Max. driving speed:	4.5 km/h
– Total length / height:	920 mm / 1150 mm	– Max. water supply:	3.5 l / min
– Clearance width:	670 mm	– Noise level:	75 dB / 69 dB BlueSave
– Tank volume (fresh/waste water):	see below	– Traction motor:	110 W
– Gel battery, maintenance-free:	24 V, 105 Ah	– Brush motor:	2x 190 W
– Working time per battery charge:	approx. 2.5 h	– Vacuum motor:	500 W
– Dead weight (including battery):	178 kg	– Brush diameter:	285 mm
		– Brush contact pressure:	2.2 N/cm ²

The TURNADO 55 is available in the following versions (also with optional networking in each case):

- TURNADO 55: with 45 l fresh and waste water plastic tank
- TURNADO 55 SV: with 45 l fresh and waste water plastic tank as a special swimming pool version
- TURNADO 55 PRO: with 50 l fresh and waste water aluminium tank with membrane wall

Important notice

The TURNADO 55 machines currently being delivered still bear the labelling and designs of the company HEFTER Cleantech, which belongs to the VERMOP Group. We expect these scrubber driers to be available in the same colour scheme as the TURNADO 55 PRO model presented here in the 2nd half of 2022.
